

Dear God, will we have only one source of news and information before this madness stops? Why not try bending over backwards to help the United States citizens for a change? The Government's continued corporate welfare is totally out of control. Must we become the United States Corporation? Was it not enough that the FCC gave away billions of dollars worth of broadcast space to corporate entities? Now you want to give them TOTAL control over our information. We have so little now! Give me a break! Suck ups!
